Subject: concerns to be addressed in EIR

I live in Moss Landing and I am concerned about the following issues

- How will this plant prevent disruption to sea life? Will the procedure be sucking them up and putting brine back into the ocean? how can it be avoided.
- How many employees will be involved. Parking and traffic are major issues here and I wonder how this will be mitigated.
- What will impact be to the town of Moss Landing? What are benefits and problems that will result?

Thank you. Nancy Russell, Moss Landing resident.
